

Assignment 1

Instructions:

As you start your assignment you will want to have a document file that you will save as **YOUR_LAST_NAMEsg1.pdf**. This file will be where you will include, answers to questions in exercises, screenshots that you are required to provide, or full solutions to exercises per given instructions. If you do not know how to create a PDF file from your document file, whether MS Word or Pages on the Mac please be sure that you ask so that you don't get a 0 for not properly submitting your work.

Complete each of the following exercises and reference the Assignment Submission Instruction file found on Blackboard.

Exercise 1:

Open the template file that you created during the first practical video of Module 1.

Add a three-line comment at the top that includes your name, your ID number and your school email address.

Save the file as: **YOUR_LAST_NAMETemplate.html** (i.e. my file would be saved as MaxwellTemplate.html)

Point Value: 10pts

Exercise 2:

Open the home page file that you created during the second practical video of Module 1.

Be sure that you have included the following information (if you did not, please be sure to add the requirements shown below):

- a. Your heading on your code file (the three-line comment specified in Exercise 1).
- b. A title to your page
- c. A top heading for your page
- d. A minimum of four paragraphs with information about YOU.

Save the file as: **YOUR_LAST_NAMEHome.html** (i.e. my file would be saved as MaxwellHome.html).

Follow the posted "Assignment Submission Instructions" for this exercise.

Point Value:

HTML validation: 10pts

Accessibility Analysis: 5pts

Screenshots of "live" site: 5pts

Exercise: 40 pts

Exercise 3:

Visit the website [http:// https://www.unitedwayathenslimestone.com/](http://https://www.unitedwayathenslimestone.com/) and create a visual site map associated to this website.

You may do this electronically or you can draw it out by hand, however be sure that anything that is part of your site map is legible. If I can't read it or understand it, it will not receive credit.

Include your visual site map in your PDF submission.

Point Value: 40pts

Exercise 4:

Visit the website <https://www.alcpl.org/>. Looking over this website design the appropriate wireframe that has been used for this website (be very careful with your design, you are only required to have the wireframe for the Home page).

Point Value: 40pts

Exercise 5:

On the last page of this assignment sheet is an image of a current website for the non-profit Peace, Love and Animals. Design a wireframe that you would recommend if you were to redesign this website, do not submit a wireframe that represents the current design.

Point Value: 40pts

Exercise 6:

One of the main focuses of this module has been “planning”. For this exercise you are going to plan out a design. I shared some information about my childhood in the Home Page video and one of my favorite restaurants in New Orleans recently closed, so I am choosing to open one up. This restaurant is going to have EVERYTHING I love about Brazilian restaurants. So not only will the restaurant have a dinner churrascaria/rodizio option, but it will have a lunch street food menu, and an afternoon plated option of foods that would be found in the churrascaria/rodizio menu or on the street foods menu. The afternoon menu does not include ALL of the foods that are found for lunch and dinner, but a selection. You get to choose the selection.

I would like for you to work on the design of the website that will be associated to it. ***In this exercise you should be able to document:***

- a. *the purpose of the website,*
- b. *the stakeholders and the target audience,*
- c. *create a site map,*
- d. *a wireframe.*

As your client, I would like for you to design a website for a Brazilian Restaurant. (Please be sure that you spell Brasil with an S and not a Z, Portuguese does not have the letter Z in its alphabet.) I am looking to open this restaurant in Athens, so of course the language to be used should be English.

Here are some sources to help you come up with the “plan” and don’t worry, as the semester goes by the plan may change (possibly even the entire restaurant concept, we will see where the semester takes us).

Top 10 street foods: <https://www.hotels.com/go/brazil/street-foods-brazil>

Facebook page for the restaurant that closed: <https://www.facebook.com/Brazilian-Market-Cafe-349873555031523>

Churascaria Rodizio restaurant: <https://texasdebrazil.com/>

To submit the solution to this exercise, you must save it separate from the other exercises. This should be a PDF document saved as YOUR_LAST_NAMEPitch.pdf (i.e. MaxwellPitch.pdf)

Please note – there is no coding for this exercise, this is 100% planning only.

Point Value:

Purpose of the website: 10pts

Stakeholders and the target audience: 5pts

Wireframe: 10pts

A site map: 15pts

(be sure to consider all of the different things that I want included on the site)

Deliverables (files to upload on Blackboard):

1. YOUR_LAST_NAMETemplate.html
2. YOUR_LAST_NAMEHome.html
3. YOUR_LAST_NAMEAsg1.pdf (this comes from the Assignment Submission Instructions)
4. YOUR_LAST_NAMEPitch.pdf

Server Accessible (files that should be accessible on the server):

1. YOUR_LAST_NAMEHome.html

OPT TO ADOPT REBA

Featured Adoptable: [Reba](#)

Reba is a very sweet girl that is looking for an athletic friend who would like to be her active companion. Reba would make a great friend to take along for those afternoon runs. She is in great shape and full of energy so you will have to be in good shape yourself to keep up with her! Her beautiful red "highlights" and pouty lips earned her the name Reba from the famous singer, Reba McEntire. Of course, we think she is just as beautiful as that famous country red head. So throw on your running shoes and come meet Reba!

[Email us](#) if are interested in giving Reba a chance in your home!

UPCOMING EVENTS

For a complete list of events please look at our [calendar](#)!

DID YOU KNOW?

State law requires Animal Control to hold animals for only five days.

Afterwards euthanization is allowed to occur.

Owner Turn-in's to the pound are usually the first to be euthanized.

Support Peace, Love, and Animals by [adopting](#), [donating](#), [volunteering](#), or [fostering](#), and help us save these precious lives.

Dog Supply - Cat Supply

OUR GOALS

- Promote the humane treatment of animals.
- Establish a rescue friendly environment through adoption programs and public awareness.
- Promote the importance of Spay and Neutering to control the pet population.
- Build a rescue friendly shelter of which the community and City will be proud.
- Educate the community on the humane treatment of animals, caring for abandoned strays, and finding homes for unwanted pets.
- Providing foster or adoption service before animals are unjustly euthanized.
